Ahmed Khaled

Backend Engineer | Software Engineer

Cairo, Egypt | +20 127 978 0804 | ahmedkhaled.study@gmail.com | linkedin.com/in/ahmed-khaled-905a1725b | github.com/AhmedFaek | ahmed-khaled-portfolio.vercel.app

Education

Ain Shams University – Faculty of Engineering Cairo, Egypt

Bachelor of Engineering in Computer Engineering *Sep 2021 – Jun 2026*

Skills

Languages: Python, JavaScript, TypeScript, Java, C++
Backend: Node.js, Express.js, FastAPI, Django
Databases: PostgreSQL, MySQL, MongoDB, Redis
APIs & Security: RESTful APIs, JSON Web Token (JWT) Authentication, Google OAuth, Role-Based Access Control (RBAC), WebSockets
AI & ML: LangGraph, Retrieval-Augmented Generation (RAG) Pipelines, Vector Search, Embedding Models, LLM Integration
Frontend: React, Next.js, Tailwind CSS
Tools & Platforms: Git, GitHub, Continuous Integration/Continuous Deployment (CI/CD), Postman

Projects

HirePilot – AI Recruitment Platform (Graduation Project, A+) 2025 – 2026

Python, FastAPI, LangGraph, PostgreSQL, ChromaDB, React GitHub | Demo

- Contributed to the asynchronous FastAPI backend architecture and REST API development for a team-built, AI-powered recruitment platform, integrating application services with stateful LangGraph workflows for CV screening, interview scheduling, and candidate re-ranking.
- Developed Google OAuth authorization and Google Calendar integration to manage interviewer availability and automate interview scheduling.
- Contributed to a real-time interview copilot that combines WebSockets, Whisper speech-to-text, and LLM-generated contextual follow-up questions.
- Worked on RAG-based conversational candidate search using ChromaDB and embedding models for semantic retrieval over CVs and interview transcripts, and integrated frontend and backend for candidate management workflows.

StarDewedar – Corporate Management Platform 2026

Node.js, Express.js, PostgreSQL, Prisma, React GitHub

- Built the backend for a bilingual corporate website and admin dashboard for a general contracting and engineering company, using a modular Controller-Service-Repository architecture with Node.js, Express.js, Prisma ORM, and PostgreSQL.
- Implemented JWT authentication with refresh-token rotation and role-based access control (RBAC) across three admin roles (Super Admin, Catalog Manager, Sales/Support), with controlled admin account creation instead of public registration.
- Developed product, category, and project management modules, plus separate Quote, BOQ, Site Visit, and contact-message workflows, each with its own data model and request validation.
- Implemented secure file uploads with MIME-type and size validation, external image storage on Cloudinary, and automated Nodemailer email notifications, and integrated the APIs with the React public site and admin dashboard.

Experience

Freelance Backend / Full-Stack Engineer Jun 2025 – Present

Self-employed *Remote*

- Designed and delivered RESTful APIs and backend services for client projects using FastAPI, Django, and Node.js with PostgreSQL and MongoDB.
- Implemented JWT authentication, Google OAuth, refresh-token revocation, and role-based access control (RBAC) across multiple client projects.

CyberOps Associate Intern Jul 2024 – Sep 2024

Cisco Networking Academy *Cairo, Egypt*

- Analyzed network vulnerabilities and applied secure system design concepts covering HTTP/HTTPS protocols, authentication, and client-server communication across a 3-month structured cybersecurity program.
