Ahmed Khaled

Backend Engineer | Software Engineer

Cairo, Egypt | +20 127 978 0804 | ahmedkhaled.study@gmail.com | linkedin.com/in/ahmed-khaled-905a1725b | github.com/AhmedFaek | ahmed-khaled-portfolio.vercel.app

Education

Ain Shams University – Faculty of Engineering Cairo, Egypt

Bachelor of Engineering in Computer Engineering *Sep 2021 – Jun 2026*

Skills

Languages: Python, JavaScript, TypeScript, Java, C++
Backend: Node.js, Express.js, FastAPI, Django
Databases: PostgreSQL, MySQL, MongoDB, Redis
APIs & Security: RESTful APIs, JSON Web Token (JWT) Authentication, Google OAuth, Role-Based Access Control (RBAC), WebSockets
AI & ML: LangGraph, Retrieval-Augmented Generation (RAG) Pipelines, Vector Search, Embedding Models, LLM Integration
Frontend: React, Next.js, Tailwind CSS
Tools & Platforms: Git, GitHub, Continuous Integration/Continuous Deployment (CI/CD), Postman

Projects

HirePilot – AI Recruitment Platform 2026

FastAPI, LangGraph, PostgreSQL, React GitHub | Demo

- Architected a modular, asynchronous FastAPI backend using layered architecture and LangGraph workflow orchestration to power AI-driven candidate screening, interview evaluation, and retrieval pipelines, reducing manual HR review time by an estimated 40%.
- Designed a real-time interview pipeline using WebSockets and self-hosted Whisper for low-latency speech transcription, live follow-up question generation, and automated post-interview evaluation across multi-step AI workflows.
- Built a Retrieval-Augmented Generation (RAG) assistant using ChromaDB, embedding models, and tool-calling LLM agents to answer recruiter queries over CVs and interview transcripts through context-aware semantic retrieval.
- Implemented secure authentication and interview scheduling with Google OAuth, JWT refresh-token rotation, role-based access control (RBAC), and Google Calendar/Meet integration for automated interview management.

StarDewedar – Corporate Management Platform 2026

Node.js, Express.js, PostgreSQL, Prisma, React GitHub

- Architected a modular REST API using Node.js and Express.js, following a layered Controller-Service-Repository architecture with Prisma ORM and PostgreSQL.
- Implemented secure authentication with JWT access tokens, refresh-token rotation, and role-based access control (RBAC) to enforce permissions across administrative operations.
- Developed backend modules for product and project management, customer Quote, BOQ, and Site Visit requests, with request validation, secure file uploads, and automated email notification workflows using Nodemailer.

Experience

Freelance Backend / Full-Stack Engineer Jun 2025 – Present

Self-employed *Remote*

- Designed and delivered 5+ scalable RESTful APIs and backend services using FastAPI, Django, and Node.js integrated with PostgreSQL and MongoDB, reducing average client time-to-launch by 30%.
- Implemented JWT authentication, Google OAuth, refresh token revocation, and role-based access control (RBAC) across 4 client projects, eliminating authentication-related security gaps.

CyberOps Associate Intern Jul 2024 – Sep 2024

Cisco Networking Academy *Cairo, Egypt*

- Analyzed network vulnerabilities and applied secure system design concepts covering HTTP/HTTPS protocols, authentication, and client-server communication across a 3-month structured cybersecurity program.
