

AHMED KHALED

Cairo, Egypt | ahmedkhaled.study@gmail.com | linkedin.com/in/ahmed-khaled | github.com/AhmedFaek

SUMMARY

Backend Engineer specializing in scalable APIs, authentication systems, real-time communication, and AI-powered backend architectures. Proficient in FastAPI, Django, Node.js, PostgreSQL, and Redis with hands-on experience in LangGraph orchestration, RAG pipelines, and WebSocket streaming.

EDUCATION

Ain Shams University – Faculty of Engineering

Bachelor of Engineering in Computer Engineering

Cairo, Egypt

Sep 2021 – Jun 2026

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++

Backend: FastAPI, Django, Django REST Framework, Node.js, Express.js

Databases: PostgreSQL, MySQL, MongoDB, Redis

APIs & Security: RESTful APIs, JWT Authentication, Google OAuth, Role-Based Access Control (RBAC), WebSockets

AI & ML: LangGraph, RAG Pipelines, Vector Search, Whisper STT, Embedding Models, LLM Integration

Frontend: React, Next.js, Tailwind CSS **Tools:** Git, GitHub, CI/CD, Postman

EXPERIENCE

Freelance Backend / Full Stack Engineer

Jan 2025 – Present

Self-employed

Remote

- Designed and delivered scalable RESTful APIs and backend services using FastAPI, Django, and Node.js integrated with PostgreSQL and MongoDB for production web applications.
- Implemented JWT authentication, Google OAuth, refresh token revocation, and role-based access control (RBAC) across multiple client projects.
- Built real-time communication features using WebSockets for live data streaming and event-driven workflows.

CyberOps Associate Intern

Jul 2024 – Sep 2024

Cisco Networking Academy

Cairo, Egypt

- Analyzed network vulnerabilities and applied cybersecurity concepts covering HTTP/HTTPS protocols, secure authentication, and client-server communication.

PROJECTS

AI-Driven HR Support System | FastAPI, LangGraph, PostgreSQL, Redis, React

2026

- Architected a modular FastAPI backend with LangGraph workflow orchestration for candidate screening, interview scheduling, and AI-powered evaluation pipelines.
- Built a real-time interview processing system using WebSockets and Whisper speech-to-text for live transcript streaming and post-interview scoring.
- Engineered RAG-based HR assistant with vector similarity search over CVs and transcripts; integrated embedding models and LLM scoring to rank candidates against job requirements.

Corporate Website & Admin System | React, Node.js, PostgreSQL, Prisma

2026

- Developed a full-stack corporate platform with modular controller/service/repository architecture; built admin APIs for product, project, and customer request management with Nodemailer notifications.

E-Commerce Platform | Node.js, MongoDB, React

2024

- Built backend services for user accounts, shopping cart, and order workflows with JWT authentication and secure password handling.

CERTIFICATIONS

CyberOps Associate
